DATE MAILED: 12/02/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

221

<b>Office Action Summary</b>	<b>Application No.</b> 09/259,757	<b>Applicant(s)</b> LEE, RONALD B.	
	<b>Examiner</b> PHUC H TRAN	<b>Art Unit</b> 2666	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

1) ☒ Responsive to communication(s) filed on 19 September 2002.

2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

4) ☒ Claim(s) 1-32 is/are pending in the application.

    4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.

5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.

6) ☒ Claim(s) 1,2,5-7,10-25,27-29 and 31 is/are rejected.

7) ☒ Claim(s) 3,4,8,9,26,30 and 32 is/are objected to.

8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

9) ☐ The specification is objected to by the Examiner.

10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.

    Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.

    If approved, corrected drawings are required in reply to this Office action.

12) ☐ The oath or declaration is objected to by the Examiner.

**Priority under 35 U.S.C. §§ 119 and 120**

13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

    a) ☐ All    b) ☐ Some \*    c) ☐ None of:

        1. ☐ Certified copies of the priority documents have been received.

        2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.

        3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

    \* See the attached detailed Office action for a list of the certified copies not received.

14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).

    a) ☐ The translation of the foreign language provisional application has been received.

15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-2, 5-7, 10-25, 27-28, and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by Fijolek et al. (U.S. Patent No. 6240464 B1).

- With respect to claims 1, 16, & 27-28, Fijolek teaches an improved communication system comprising a customer premises equipment (block 18 in Fig. 1) connected to a data network (block 28 in Fig. 1) via a network connection (block 10 in Fig. 1), the customer premises equipment being operable to communicate with the data network when configured with a client network address (e.g. the CPE received IP address before communicate with the data network through block 10 in Fig. 1), the customer premises equipment being operable to issue configuration messages to a configuration server connected to the data network to retrieve the client network address from the configuration server (col. 2, lines 31-46), the improvement

Art Unit: 2666

comprises: a communications device connects the customer premises equipment to a local network, the local network connects to the data network via a network interconnection device (e.g. Fig. 1 shows blocks 12, 16, 14, 22, 24); and temporary configuration server for responding to configuration messages from the customer premises equipment before the network connection is capable of connecting the customer premises equipment to the data network (col. 28, lines 22-28).

- With respect to claim 2, Fijolek discloses the network connection comprising a communications device for connecting the customer premises equipment to a local network (e.g. block 20 in Fig. 1), the local network being connected to the data network via a network interconnection device (e.g. block 26 in Fig. 1).

- With respect to claim 5, Fijolek also teaches the communications device includes a cable modem (block 16 in Fig. 1), the local network includes a cable network (block 14 in Fig. 1) and the network interconnection device includes a cable modem termination system (block 12 in Fig. 1).

- With respect to claim 6, Fijolek teaches the cable network is a bi-directional cable network (e.g. Fig. 1 shows the cable network is bi-directional).

- With respect to claim 7, Fijolek discloses the local network further includes a general switched telephone network (block 22 in Fig. 1); the cable modem includes a telephone connection to the general switched telephone network (shows in Fig. 1 block 16 connects to block 22); and the network interconnection device includes a telephony remote access concentrator for sending messages from the cable modem to the data network (e.g. block 24 in Fig. 1).

Art Unit: 2666

- With respect to claims 10 & 17, Fijolek teaches the configuration server is a dynamic host configuration protocol server (e.g. block 66 in Fig. 3).
- With respect to claim 11, Fijolek further teaches the network address used by the customer premises equipment is an Internet protocol address (col. 8, line 61).
- With respect to claims 12 & 18, Fijolek teaches wherein the temporary configuration server responds to configuration messages with a temporary network address (e.g. block 66 in Fig. 2 provides configuration parameters for network host interface).
- With respect to claims 13, 19 & 24, Fijolek discloses wherein the temporary configuration server responds to configuration messages with a lease time for setting a time limit for the temporary network address (col. 4, lines 31-36).
- With respect to claims 14 & 20, Fijolek teaches wherein the lease time is less than 10 seconds (col. 30, lines 35-41).
- With respect to claims 15 & 22, Fijolek also teaches wherein the data network includes a connection to the Internet (see bridge paragraph between col. 1 & 2).
- With respect to claim 21, Fijolek wherein the cable modem configuration protocol client declines to renew the temporary network address when the cable modem is capable of connecting the customer premises equipment to the data network (col. 22, lines 33-45).
- With respect to claims 23, 25, & 31, Fijolek a method for ensuring a connection to a configuration protocol server on a data network by a customer premises equipment via a network connection (e.g. Fig. 1), the method comprising the steps of: issuing a request for a customer premises equipment network address from the customer premises equipment to the configuration protocol server via the network connection (e.g. the CPE establish a connection through CM 16

Art Unit: 2666

and to telephone remote access concentrator for communication); sending a lease time for the customer premises equipment network address limiting the time of validity of the temporary network address (col. 4, lines 31-36); issuing a request to renew the temporary network address when the lease time expires (e.g. Fig. 19, steps 350-354); the network connection determining whether a connection can be made to the configuration protocol server, and if not, responding to the customer premises equipment by sending a temporary network address to the customer premises equipment (col. 2, lines 18-47).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fijolek et al. (U.S. Patent No. 6240464 B1) in view of Beser (U.S. Patent No. 6212563 B1).

- With respect to claim 29, Fijolek teaches an improved communication system comprising a customer premises equipment (block 18 in Fig. 1) connected to a data network (block 28 in Fig. 1) via a network connection (block 10 in Fig. 1), the customer premises equipment being operable to communicate with the data network when configured with a client network address (e.g. the CPE received IP address before communicate with the data network through block 10 in Fig. 1), the customer premises equipment being operable to issue configuration messages to a configuration server connected to the data network to retrieve the

Art Unit: 2666

client network address from the configuration server (col. 2, lines 31-46), the improvement comprises: a communications device connects the customer premises equipment to a local network, the local network connects to the data network via a network interconnection device (e.g. Fig. 1 shows blocks 12, 16, 14, 22, 24); and temporary configuration server for responding to configuration messages from the customer premises equipment before the network connection is capable of connecting the customer premises equipment to the data network (col. 28, lines 22-28). Fijolek fails to teaches the local network including a network of the type select from the group consisting of: Ethernet and token ring. Beser discloses the local network that includes the group of Ethernet and token ring (col. 13, line 1). Therefore, it would have been obvious to a person in ordinary skill in the art at the time of the invention was made to implement the local network of Beser in to Fijolek for connecting equipment and controlling the network.

#### ***Allowable Subject Matter***

5. Claims 3-4, 8-9, 26, 30, & 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

6. The following claim 25 was indicated allowable by examiner in previous office action; however, these claims are unpatentable in view of new arts. Therefore, these indicated claims are withdrawn.

7. Applicant's arguments with respect to claims 1-2, 5-7, 10-25, 27-29, & 31 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2666

*Conclusion*

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHUC H TRAN whose telephone number is (703) 308-7471. The examiner can normally be reached on M-F (8-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, RAO SEEMA can be reached on (703) 308-5463. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9314 for regular communications and (703) 872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 872-9314.
